

Biodesix Announces New Master Collaborative Research Agreement with Leading US Cancer Center

March 25, 2024

LOUISVILLE, Colo.--(BUSINESS WIRE)--Mar. 25, 2024-- Biodesix, Inc. (Nasdaq: BDSX), a leading diagnostic solutions company with a focus in lung diseases, today announced that it has entered into a new master collaborative research agreement (MCRA) with Memorial Sloan Kettering Cancer Center (MSK) under which the teams will collaborate on a development plan for diagnostic tests aimed at improving the treatment of cancer.

Biodesix will utilize its array of genomics, proteomics, and data mining capabilities with the aim of developing and commercializing oncology biomarker assays in collaboration with [MSK](#). Bio-Rad will provide its industry-leading digital PCR assay technology in support of this important work.

The collaborators, represented by Dr. Howard Scher (MSK) and Dr. Gary Pestano (Biodesix), will share an update at the 31st International Precision Medicine Tri-Con meeting ([PMTIC](#)) on March 25: "An Industry | Academic Collaboration Framework Focused on Novel Diagnostic Test Development in Oncology".

"The expansion of our previous master sponsored research agreement (MSRA) into a master collaborative research agreement with MSK is a significant milestone for Biodesix and for biomarkers in oncology diagnostics. Biodesix looks forward to co-developing and validating new test concepts under these agreements," said Scott Hutton, CEO, Biodesix.

"We look forward to working with Biodesix to develop the next generation of highly multiplexed digital PCR assays as part of our expanding oncology offering," said Simon May, EVP and President of Life Sciences at Bio-Rad Laboratories. "Bio-Rad provides the leading solution for digital PCR, and we are committed to providing oncology researchers and commercial partners with technologies that enable everything from biomarker discovery to clinical trials and patient monitoring of minimal residual disease."

About Biodesix

Biodesix is a leading diagnostic solutions and services company with a focus in lung disease. The Company develops diagnostic tests addressing important clinical questions by combining multi-omics through the power of artificial intelligence. Biodesix offers five Medicare-covered tests for patients with lung diseases. The blood based Nodify Lung® Nodule Risk Assessment testing strategy, consisting of the Nodify XL2® and the Nodify CDT® tests, evaluates the risk of malignancy in incidental pulmonary nodules, enabling physicians to better triage patients to the most appropriate course of action. The blood based IQLung™ strategy for lung cancer patients integrates the GeneStrat® targeted ddPCR™ test, the GeneStrat NGS® test and the VeriStrat® test to support treatment decisions across all stages of lung cancer with results in an average of two to three business days, expediting the time to treatment. Biodesix also leverages the proprietary and advanced Diagnostic Cortex® AI (Artificial Intelligence) platform, to collaborate with many of the world's leading biotechnology and pharmaceutical companies to solve complex diagnostic challenges in lung disease. Note Regarding Forward-Looking Statements

This press release may contain forward-looking statements that involve substantial risks and uncertainties for purposes of the safe harbor provided by the Private Securities Litigation Reform Act of 1995. All statements contained in this press release other than statements of historical fact, are forward-looking statements. The words "believe," "may," "will," "estimate," "continue," "anticipate," "intend," "plan," "expect," "predict," "potential," "opportunity," "goals," or "should," and similar expressions are intended to identify forward-looking statements. Such statements are based on management's current expectations and involve risks and uncertainties. Actual results and performance could differ materially from those projected in the forward-looking statements as a result of many factors. Biodesix has based these forward-looking statements largely on its current expectations and projections about future events and trends. These forward-looking statements are subject to a number of risks, uncertainties, and assumptions. Forward-looking statements may include information concerning the impact of backlog and the timing and assumptions regarding collection of revenues on projections, availability of funds and future capital including under the term loan facility, expectations regarding revenue and margin growth and its impact on profitability, and the impact of a pandemic, epidemic, or outbreak, including the COVID-19 pandemic, on Biodesix and its operations and financial performance. Forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified. The Company's ability to continue as a going concern could cause actual results to differ materially from those contemplated in this press release and additionally, other factors that could cause actual results to differ materially from those contemplated in this press release can be found in the Risk Factors section of Biodesix most recent annual report on Form 10-K, filed March 1, 2024. Biodesix undertakes no obligation to revise or publicly release the results of any revision to such forward-looking statements, except as required by law. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. All forward-looking statements are qualified in their entirety by this cautionary statement.
